

1. A golf glove, comprising:
- a palm portion;
 - a raised elongated guide pad extending diagonally across a portion of the palm
- 5 portion between a thumb portion and a finger portion and secured to the palm portion;
- the guide pad being substantially parallel to a transverse crease of a hand and
- extending across the palm portion of the golf glove for a distance between a first position
- corresponding to a first end of the guide pad and a second position corresponding to a
- second end of the guide pad;
- 10 the distance being less than substantially all of a breadth of the palm portion;
- the guide pad having a length insufficient to form an obstruction when used with a
- second glove having a second raised elongated guide pad.
2. The golf glove of claim 1 wherein the guide pad has a cross section diameter of about
- 15 eight millimeters.
3. The golf glove of claim 1 wherein the first position is about an exterior edge of a
- forefinger portion of the glove and the second position is about a midpoint of a second
- finger portion of the glove.
- 20
4. The golf glove of claim 1 wherein the guide pad comprises a sheath substantially
- surrounding a core.

5. The golf glove of claim 4 wherein the core is substantially cylindrical in shape.

6. The golf glove of claim 4 wherein the core is comprised of substantially rigid foamed material.

5

7. A pair of golf gloves comprising:

a first glove having a palm portion;

a raised elongated guide pad extending diagonally across a portion of the palm portion between a thumb portion and a finger portion and secured to the palm portion;

10 the guide pad being substantially parallel to a transverse crease of a hand and extending across the palm portion of the golf glove for a distance between a first position corresponding to a first end of the guide pad and a second position corresponding to a second end of the guide pad;

the guide pad having a length insufficient to form an obstruction when used with a
15 second glove having a second raised elongated guide pad;

a second glove having a second palm portion;

a second raised elongated guide pad extending diagonally across a portion of the second palm portion between a second thumb and second finger portions and secured to the second palm portion;

20 the second guide pad being substantially parallel to a transverse crease of a second hand and extending across the second palm portion of the second golf glove;

the second guide pad having a length insufficient to form an obstruction when used with the first glove.

8. The pair of golf gloves of claim 7 wherein the first and second guide pads have a cross section diameter of about eight millimeters.
- 5 9. The pair of golf gloves of claim 7 wherein the first position of the first glove is about an exterior edge of a forefinger portion of the first glove and the second position is about a midpoint of a second finger portion of the first glove.
- 10 10. The pair of golf gloves of claim 7 wherein the second guide pad extends across substantially the entire second palm portion of the second glove.
11. The pair of golf gloves of claim 7 wherein the first and second guide pads are each comprised of a sheath substantially surrounding a core.
- 15 12. The pair of golf gloves of claim 11 wherein the core is substantially cylindrical in shape.
13. The pair of golf gloves of claim 11 wherein the core is comprised of substantially rigid foamed material.
